Torlon Hill, Guatemala: HIGHLIGHTS

Rationale for Guatemala – Risk Level

- Direct ownership
- Business relationship
- Road, power into property
- No displacement of people
- Mining already taking place
- Excellent access to ports, Pan-American Highway

- \$385,000 USD purchase price for surface and subsurface rights
- Firestone Ventures was invited to make a business deal with the local people.
- Ready to drill, zinc (smithsonite) exposed on surface

Torlon Hill, Guatemala

Firestone Ventures Inc. began the first drill program at Torlon Hill in January, 2006. To date, 4953 metres in 64 drill holes have been completed.

Torlon Hill, Guatemala: HIGHLIGHTS

Core from Drill Hole TH06-02. Zinc mineralization is in the form of smithsonite, a zinc carbonate. This section returned 47% zinc.

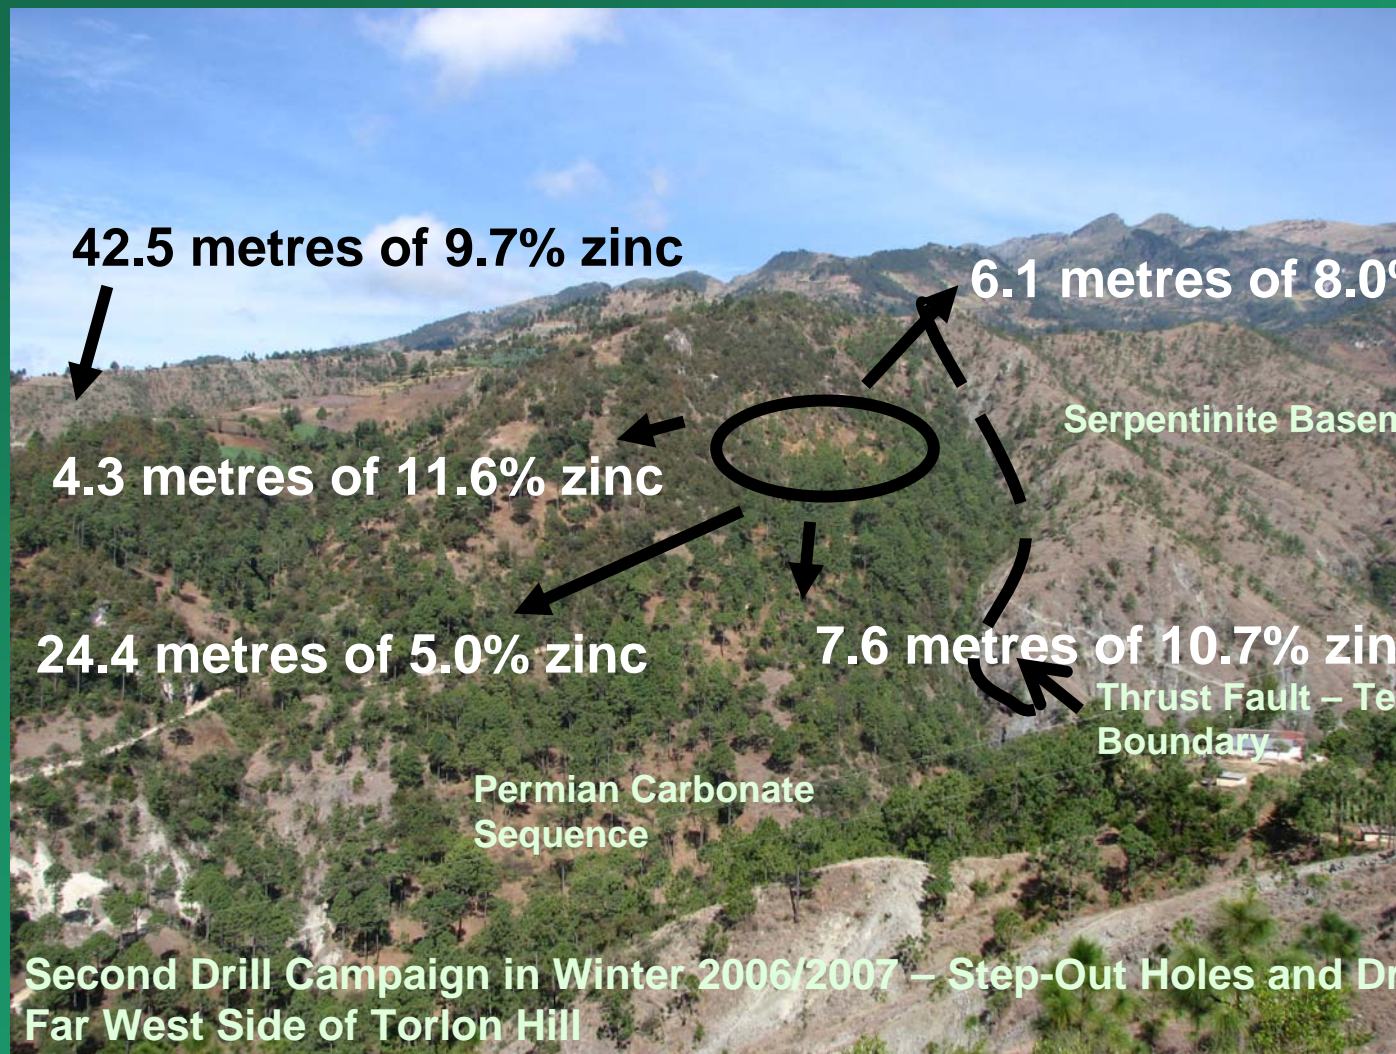

33.0 metres of 21% zinc (Drill Hole TH06-02)

53.0 metres of 10.2% zinc (Drill Hole TH06-13)

46.7 metres of 12.5% zinc (Drill Hole TH06-14)

Bulge area of High-Grade Zinc (Smithsonite) exposed on surface

First Drill Campaign in Winter/Spring 2006 Concentrated on the “Bulge” area

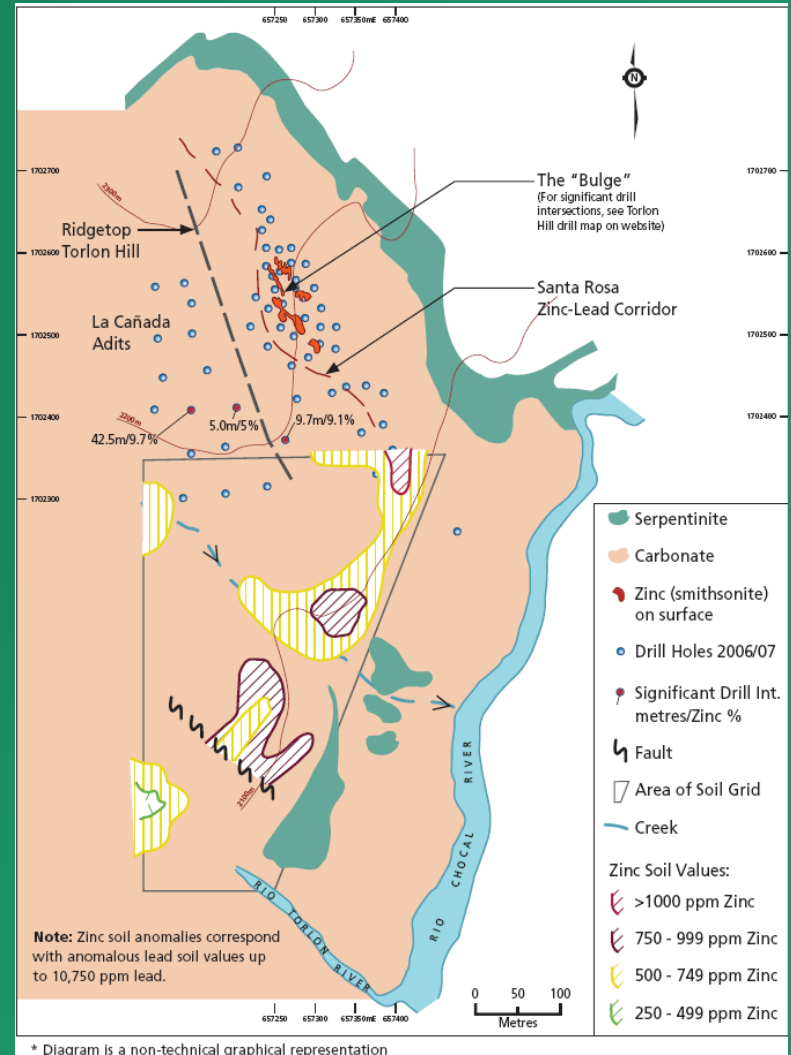

Second Drill Campaign in Winter 2006/2007 – Step-Out Holes and Drilling on the Far West Side of Torlon Hill

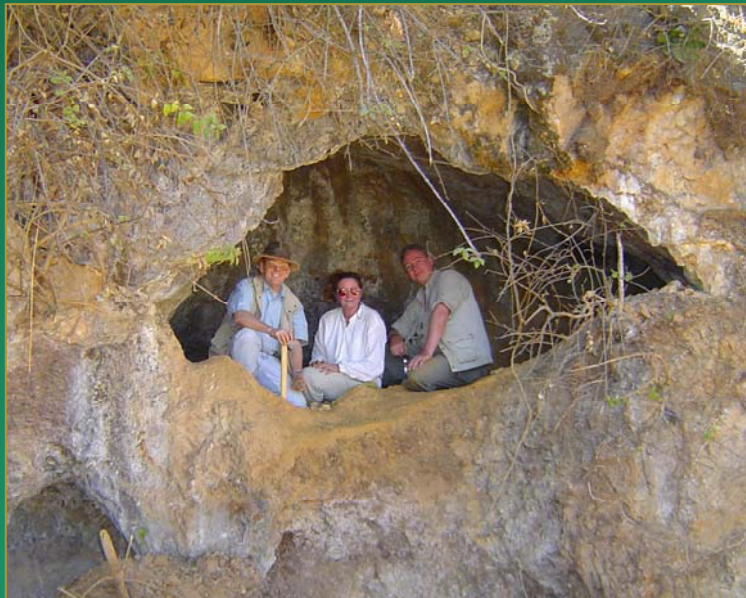

**Drill pad
surrounded by
stockpiles of
zinc carbonate
(reddish orange
color).**

Torlon Hill, Guatemala: Exploration Potential

Results of May, 2007 soil sampling program shows zinc-lead soil anomalies extending south of previously drilled area.

Torlon Hill, Guatemala: **HIGHLIGHTS**

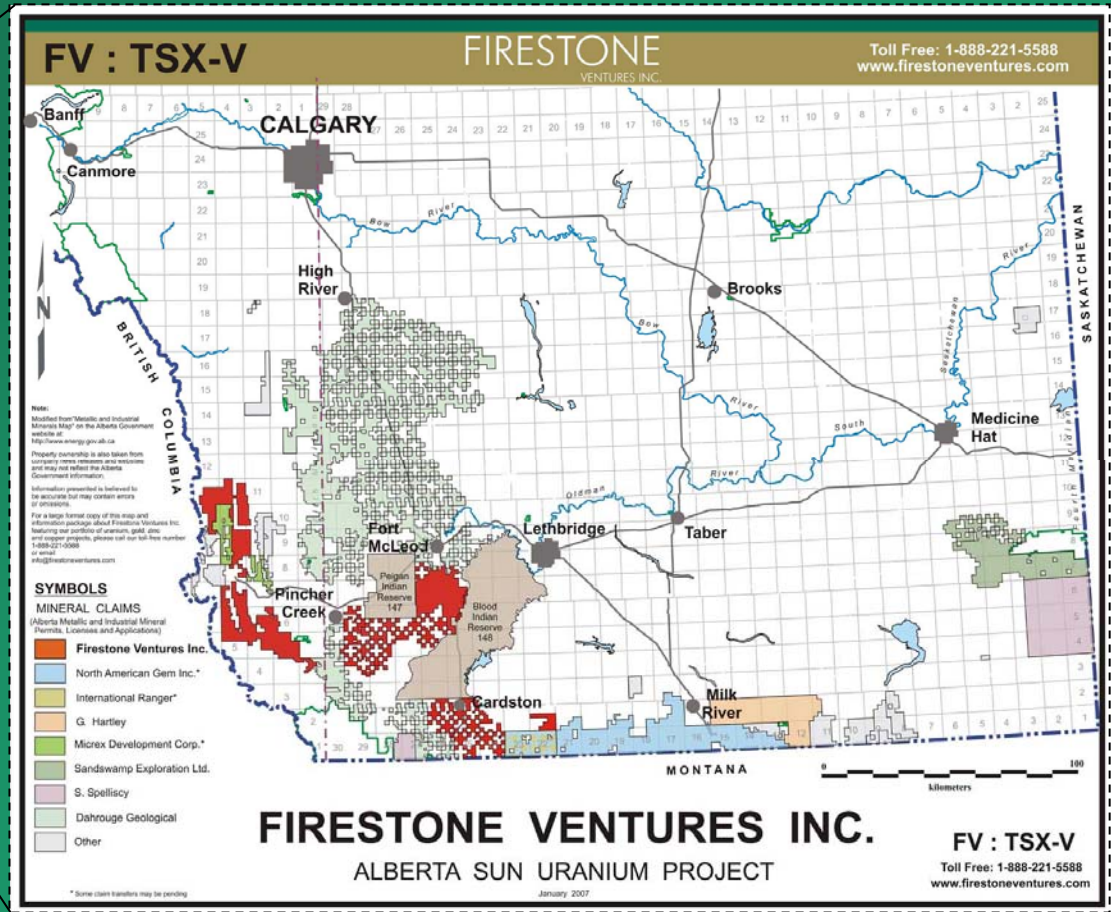

Torlon Hill Zinc: What's Next?

- Summer 2007 - Drill hole data compilation
- Summer 2007 – Metallurgical testing
- Fall 2007 – Preliminary Resource Estimate
- Fall/Winter 2007 – Continued drilling

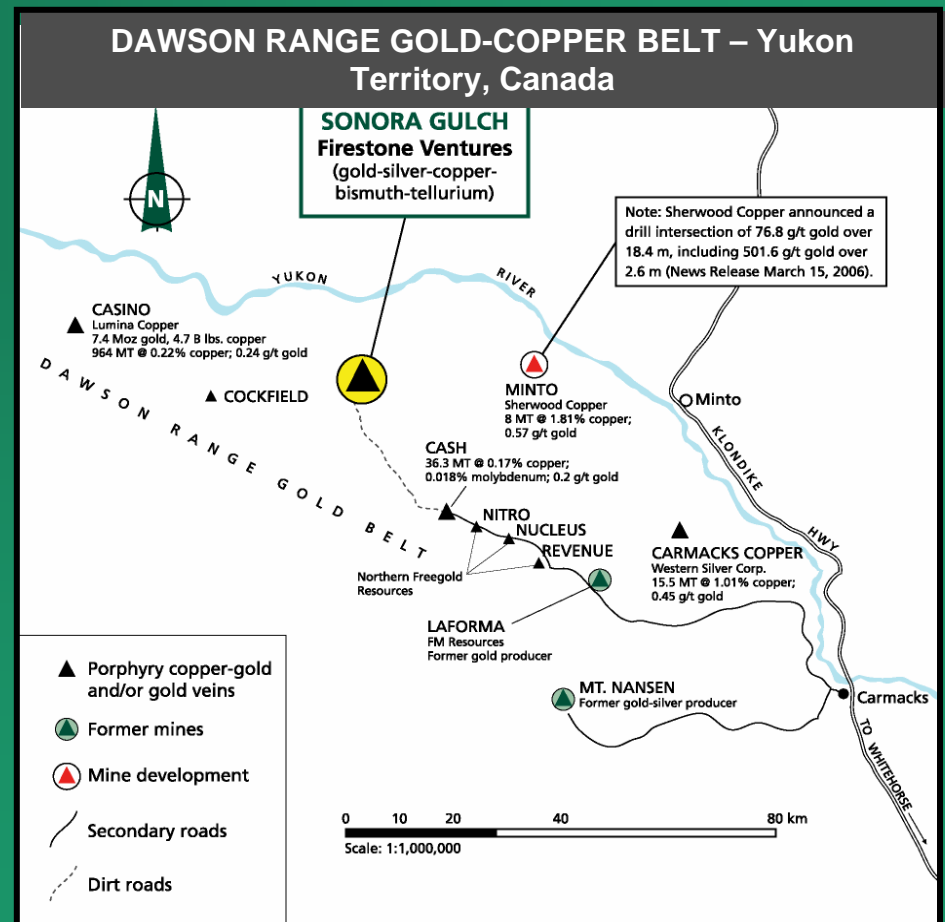

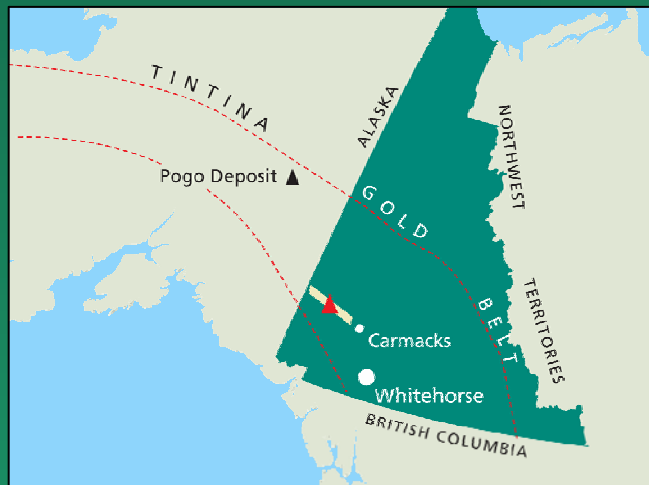

Alberta Sun Uranium Project, SW Alberta

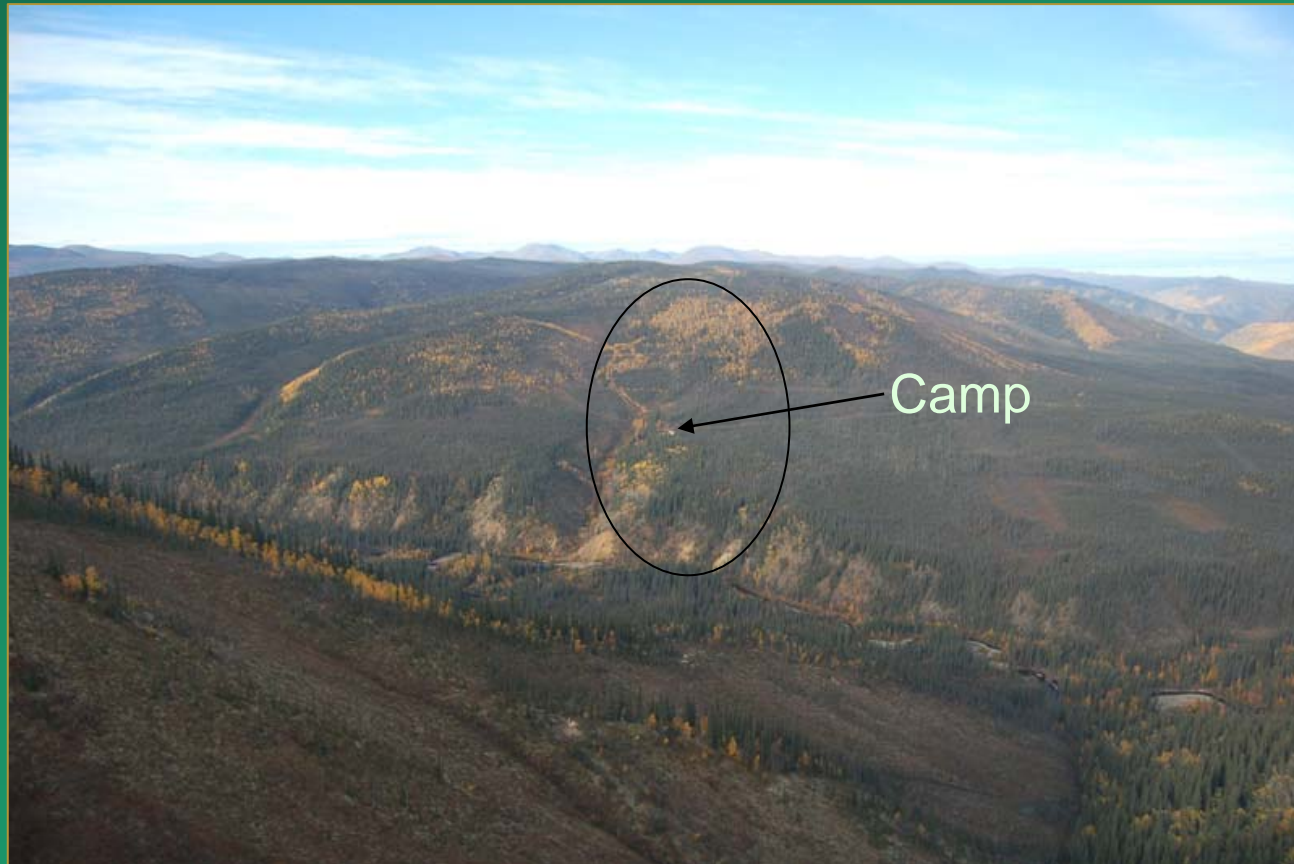

Alberta Sun Uranium Project, SW Alberta

- Firestone holds 100% interest in 207,750 acres prospective for roll-front uranium deposits.
- Completed 2,384 line kilometers of airborne electromagnetic and magnetic surveying in 2007.
- In June, 2007, Firestone announced that the Alberta Sun Uranium Properties had been optioned to Black Hawk Exploration.

Sonora Project, Yukon

Sonora Project, Yukon

Sonora Project, Yukon

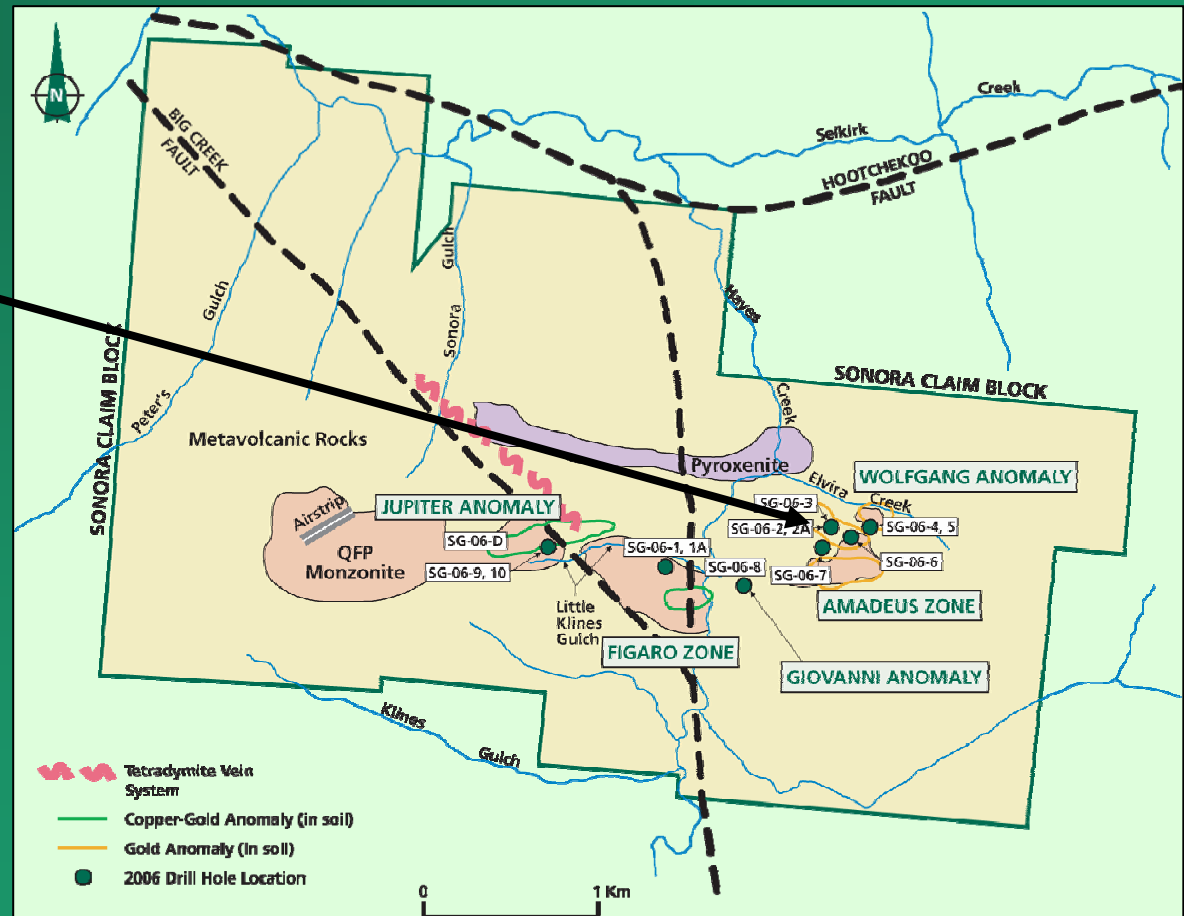

2006 Drilling

6.2 g/t gold over 15.2 metres including 12 g/t gold over 5.0 metres

Open at Depth

2007 Program:

2,400 metre diamond drill program underway

FIRESTONE VENTURES INC.

- Strong outlook for zinc, uranium and gold
- Aggressive drill programs, year-round exploration
- Balance of exploration, business and mine development expertise
- Increased marketing and promotion, especially in European markets
- Focus is on advancing current projects
- Attractive entry level for investment in zinc, uranium and gold
