

FIRESTONE

VENTURES INC.

Profile: DIRECTORS AND MANAGEMENT TEAM

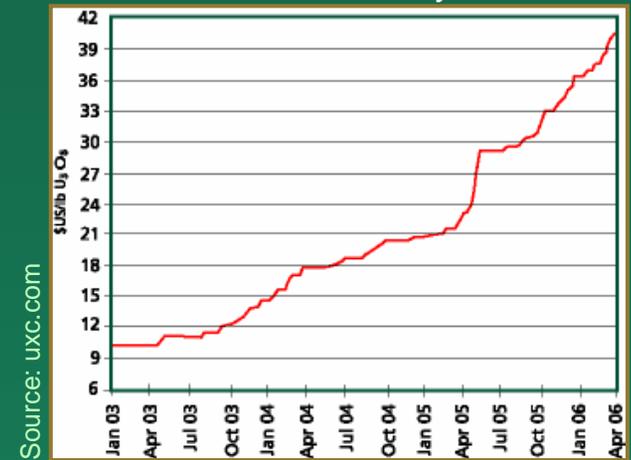

Management has a track record of public company experience and project management:

Lori Walton, P. Geol:	<i>President, CEO, Director</i>
Ken Powell:	<i>CFO, Director</i>
Pamela Strand, P. Geol:	<i>Director, President of Shear Minerals</i>
John Kowalchuk, P. Geol:	<i>Director</i>
Peter Aubry:	<i>Advisor</i>
Legal:	<i>Bryan & Company</i>
Audit:	<i>Stout & Company</i>

Zinc Price 5 yrs.

Uranium Price 3 yrs.

LME Zinc Warehouse Stocks 1 yr.

Gold Price 5 yrs.

EXPLORATION GOALS FOR 2006

ZINC

Complete drill program, mini bulk-sample and 43-101 compliant resource estimate.

URANIUM

Complete surface exploration, plan drill program, seeking joint venture partner

EXPLORATION GOALS FOR 2006

GOLD

Complete surface exploration and conduct drilling on Sonora gold property, Yukon.

Road building, drilling on Morris property, British Columbia.

Overview: PROPERTIES

1. Torlon Hill Project, Guatemala: **ZINC**
2. Alberta Sun Project, Alberta: **URANIUM**
3. Sonora Project, Yukon: **GOLD, SILVER**
4. Morris Project, BC: **GOLD, SILVER, ANTIMONY, COPPER**
(Letter of intent – MacLellan Mining Group)

Overview: PROPERTIES

Torlon Hill Project, Guatemala: **ZINC**

- Drill-ready high-grade zinc prospect in Guatemala, Central America
- Located near Pan-American Highway, excellent access to Pacific Region zinc markets
- Numerous underground workings on property due to small-scale lead mining

Torlon Hill Project, Guatemala: ZINC (Cont'd)

- Zinc mineralization (smithsonite) extends over a 100 m x 700 m area
- In the central area, there are two sheets of zinc mineralization with an average grade of 20.3% zinc over true widths of 1-9 m including a high-grade zone that grades 28.4% zinc over 9 m.
- The Torlon property has never been drilled; there is excellent potential for expansion of known zinc mineralization and for discovering additional zinc zones.

Torlon Hill Project, Guatemala: ZINC (Cont'd)

Firestone has an option purchase agreement with the owners for 100% of the Torlon property and acquired a 100% interest in the surrounding "Orbita" concession.

2,000 m drill program planned for early 2006 and preparation of 43-101 compliant resource estimate.

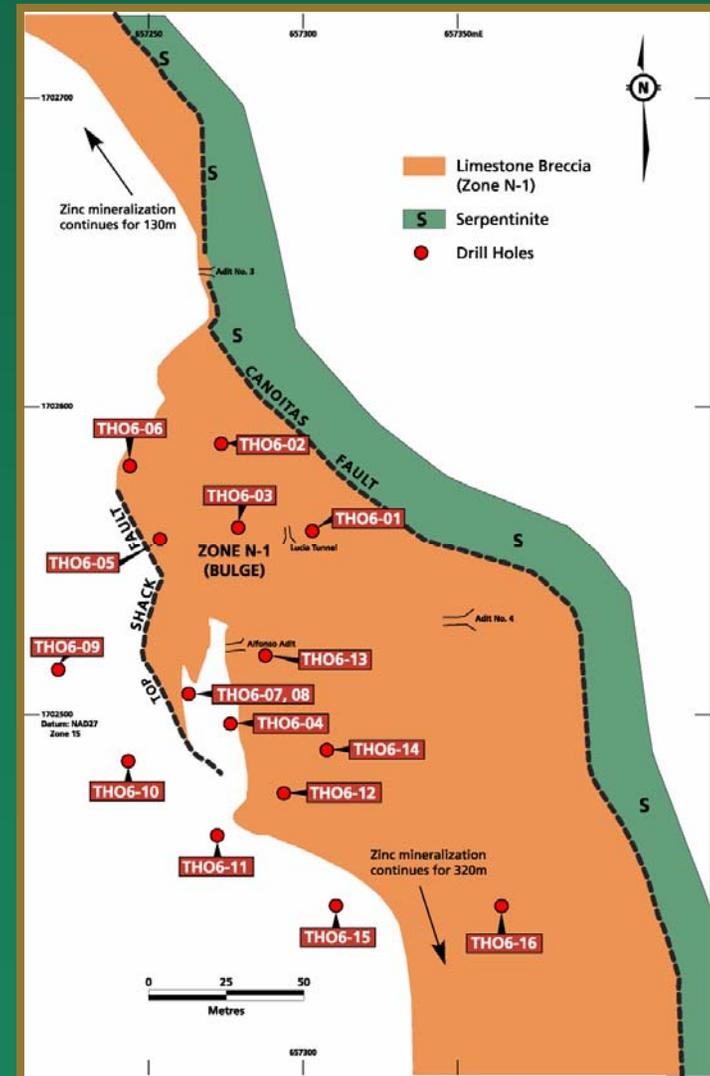

Torlon Hill Project, Guatemala: ZINC (Cont'd)

The 2006 diamond drill program, designed to delineate broad zones of high-grade zinc mineralization (smithsonite) throughout the limestone breccia.

Hole #	Depth (m)	Incl.
THO6-1	33.0	-90
THO6-2	57.9	-90
THO6-3	45.5	-90
THO6-4	80.8	-90
THO6-5	79.2	-90
THO6-6	73.2	-90
THO6-7	86.6	-90
THO6-8*	83.3	-60
THO6-9	120.4	-90
THO6-10	115.8	-90
THO6-11	103.6	-90
THO6-12	77.7	-90
THO6-13	61.0	-90
THO6-14	61.0	-90
THO6-15	73.0	-90
THO6-16	44.2	-90

Holes THO6-17 through THO6-22 pending.

Note: Figure is modified from Redhawk Resources figure.

Torlon Hill Project, Guatemala: HIGHLIGHTS

Geology fieldwork at Torlon Hill.
Numerous tunnels and high grade
zinc mineralization visible on surface.

Torlon Hill Project, Guatemala: **HIGHLIGHTS**

Mineralized
breccia and zinc
zap reaction
(before and after).

Torlon Hill Project, Guatemala: HIGHLIGHTS

Firestone QP John Cleary examining drill core on the TH06-3 drill site.

Overview: PROPERTIES

Alberta Sun Project, Alberta: **URANIUM**

- New exciting uranium prospect in southwestern Alberta
- Exploring for sandstone-hosted uranium deposits
- Sandstone-hosted uranium deposits account for 19% of worlds uranium resources
- Typical deposit grades from 0.02 to 0.40% U_3O_8

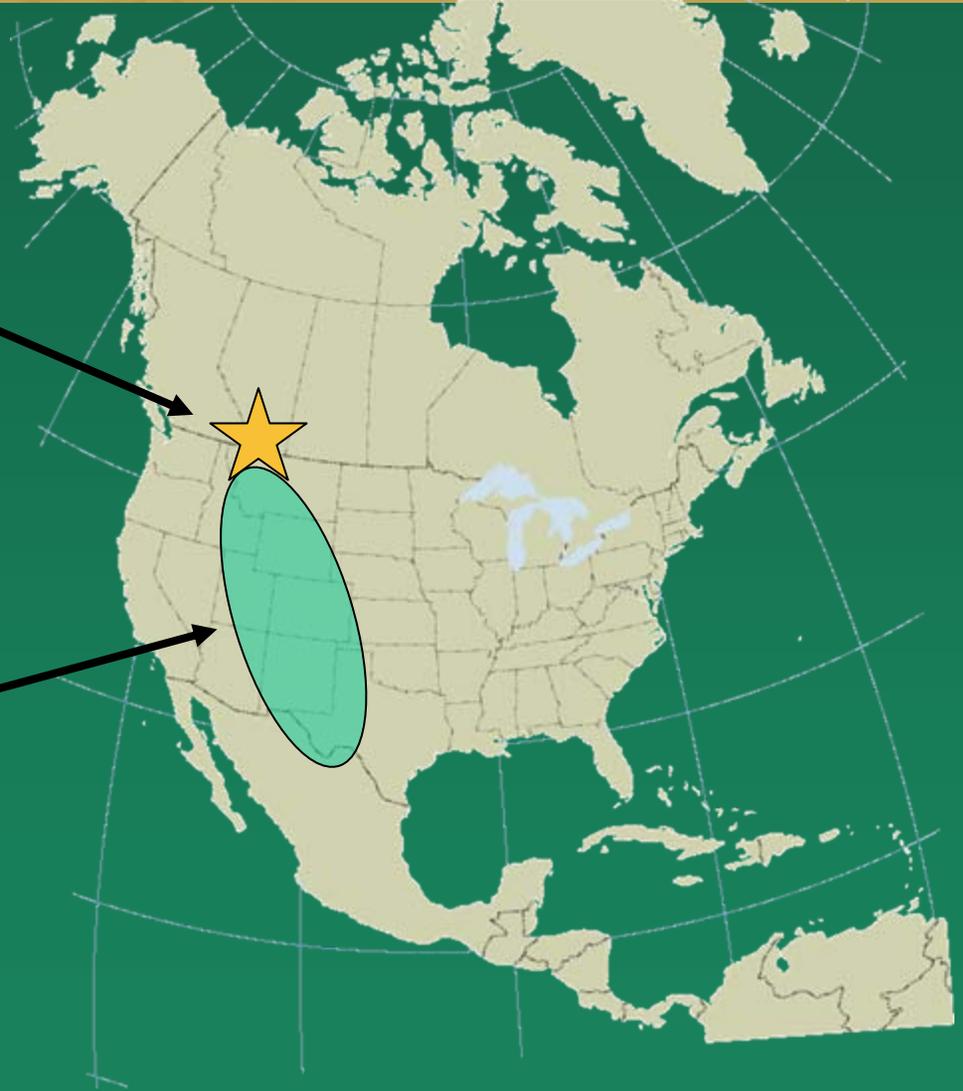

Alberta Sun Project, Alberta: **URANIUM** (Cont'd)

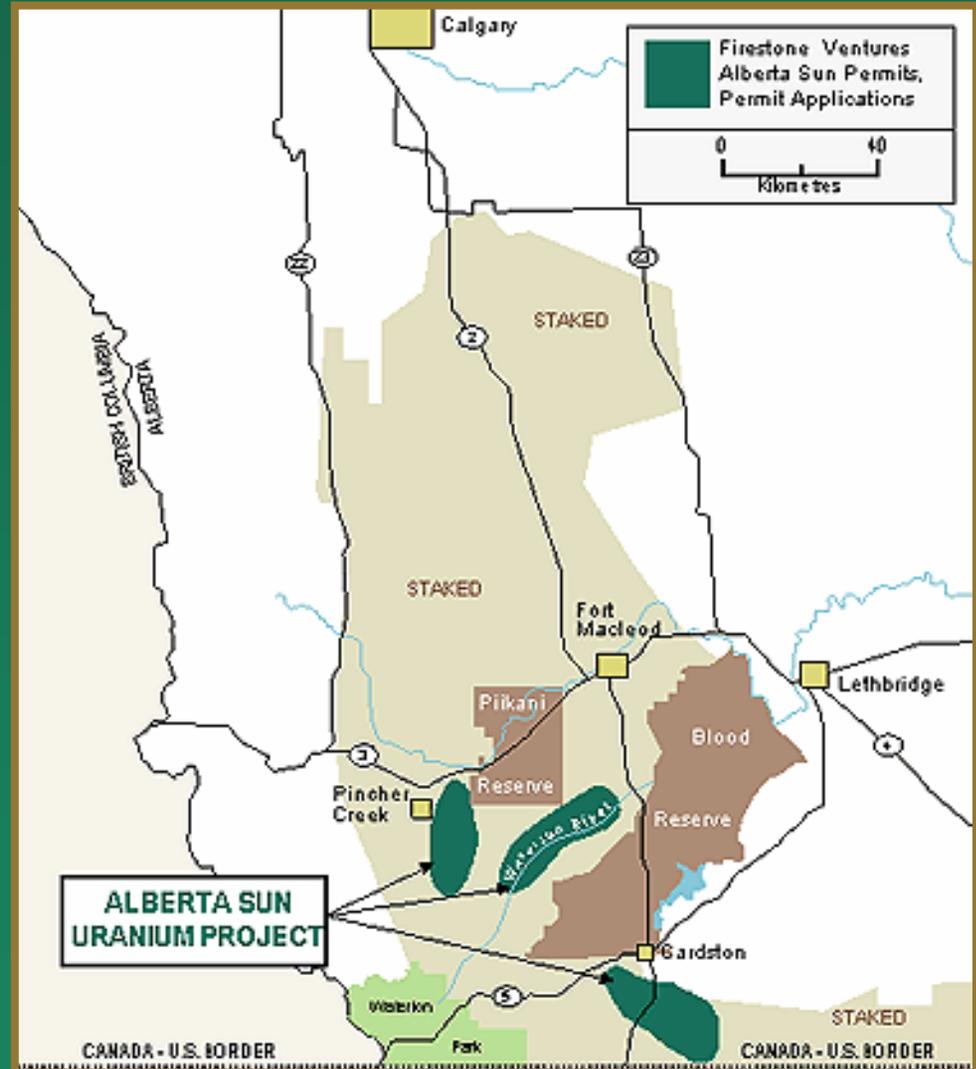

- Sandstone-hosted uranium deposits may be amenable to low cost and low impact injection-solution mining methods (ISL).
- Southern Alberta was explored for uranium previously but promising areas were never drilled. No exploration has taken place since 1981.
- Firestone Ventures has 100% interest in over 100,000 acres

**Firestone Ventures Inc.
Alberta Sun
Uranium Project**

**Injection-solution
mining of uranium
in United States**

Alberta Sun Property, Southwestern Alberta **URANIUM**

Alberta Sun Property, Alberta: **HIGHLIGHTS**

**Waterton River –
Rock sampling
and measuring
radioactivity**

Alberta Sun Property, Alberta: HIGHLIGHTS

Kimball Zone

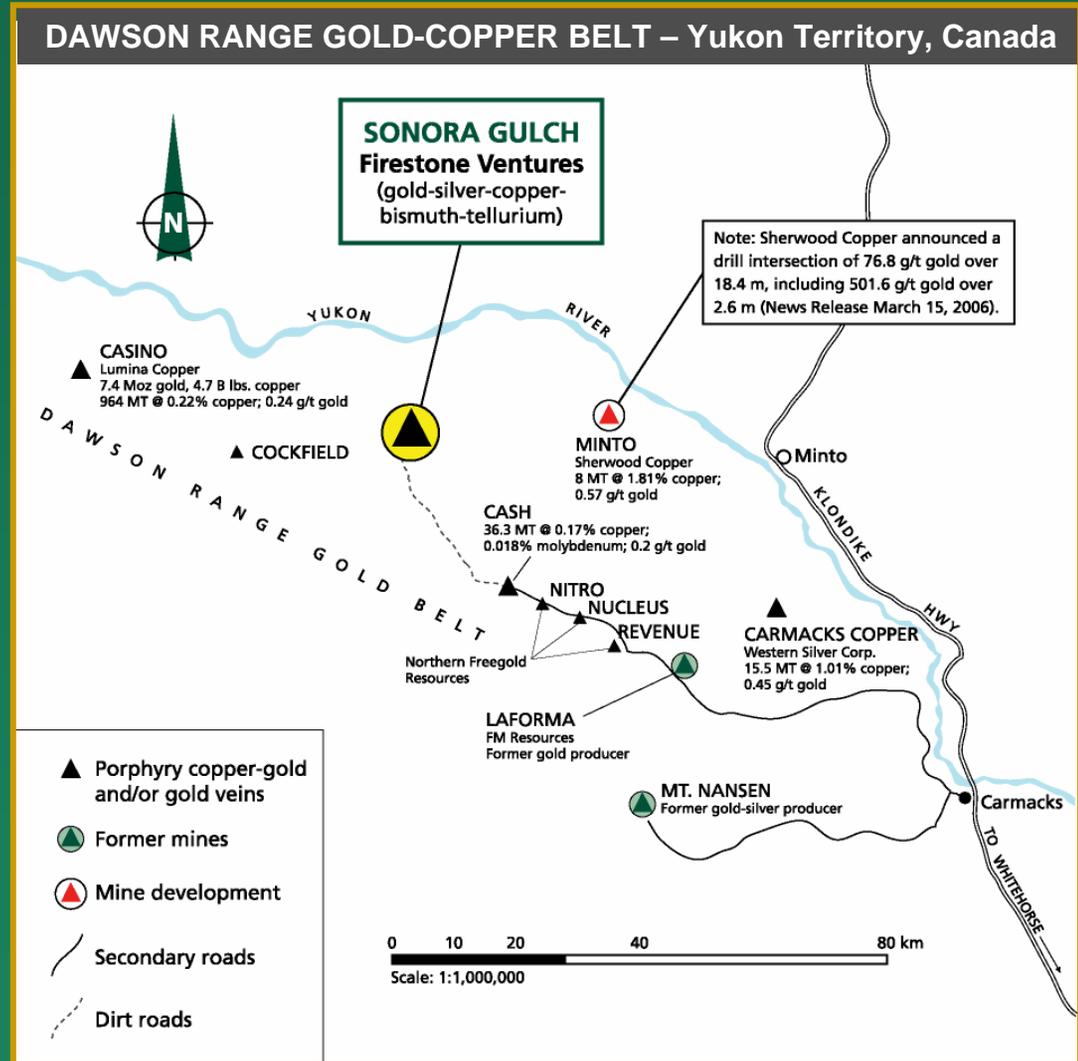

40 km southeast of
Waterton River.

Sandstone boulder –
measures 1250 cps (counts
per second) and returned
150 ppm uranium (0.018
 U_3O_8) and elevated
vanadium and lead.

Overview: PROPERTIES

Sonora Project,
Yukon: **Gold, Silver**

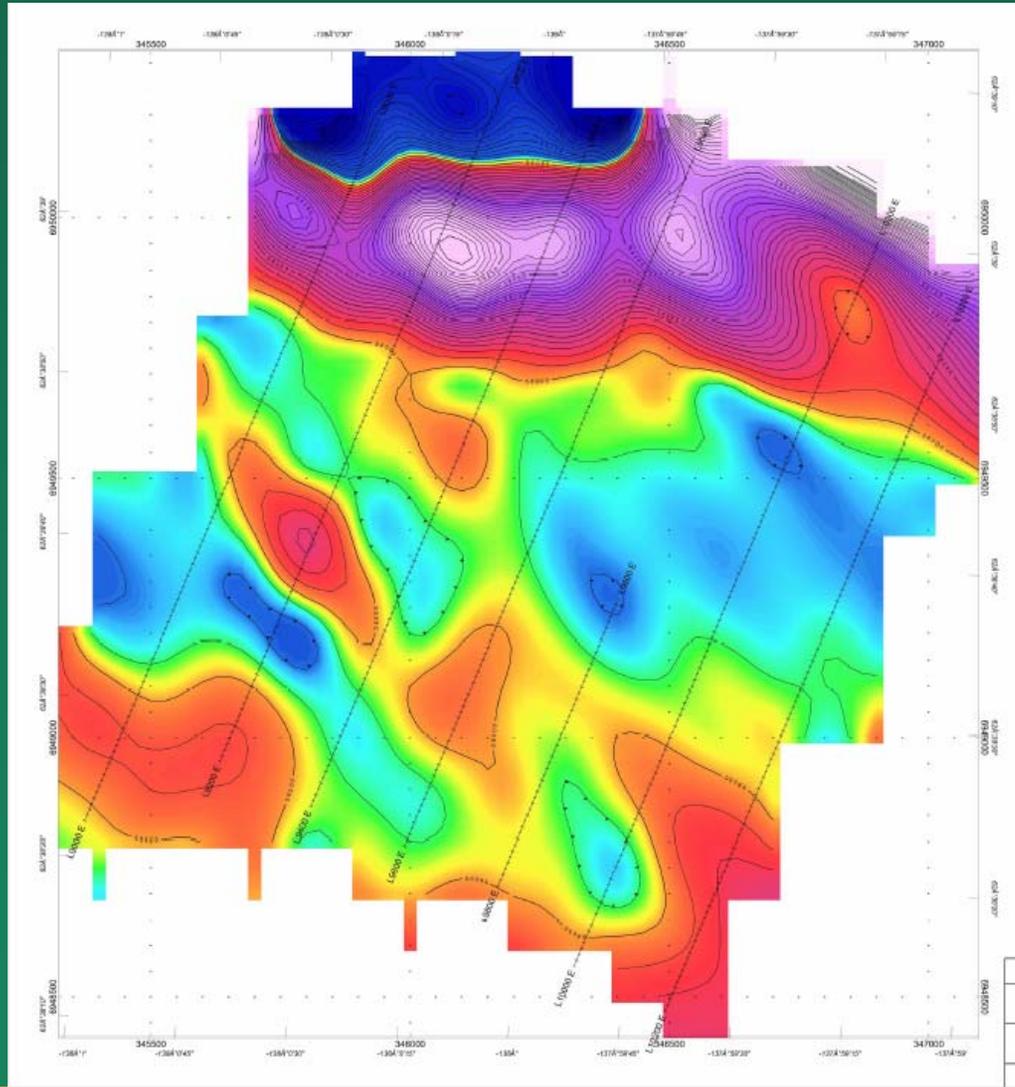

Sonora Project, Yukon: **Gold, Silver**

- **Gold-silver-copper prospect situated within gold-copper belt of ex-producers and advanced prospects near Carmacks, Yukon Territory, Canada**
- **Well-situated in established gold-copper district**
- **Placer gold in creeks draining property**

Sonora Project, Yukon: **Gold, Silver**

- Evidence of at least two mineralized gold systems
- Similar geochemistry and mineralogy as Pogo high grade gold deposit in Alaska
Gold, bismuth, tellurium, tetradymite, native gold mineralogy
- Option for 80% of property

Morris Property, British Columbia: **GOLD, SILVER COPPER, ANTIMONY**

- High grade multi-ounce gold veins with up to 32% antimony content in south-central British Columbia
- Property dormant for 23 years
- High-grade vein system, copper zone

Morris Property, British Columbia: GOLD, SILVER COPPER, ANTIMONY

- **Road-accessible (Road requires upgrade)**
- **Signed Letter of Intent with MacLellan Mining Group**

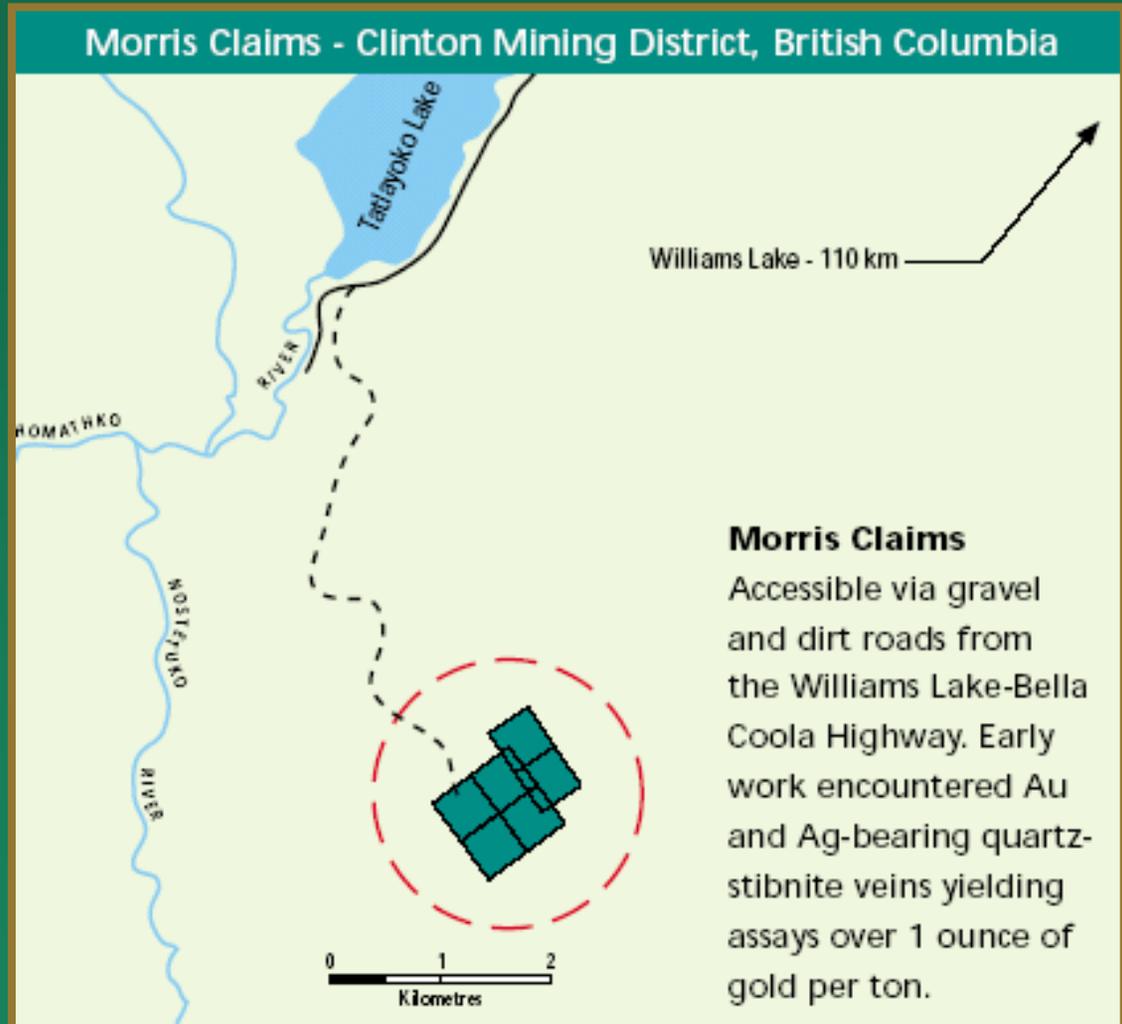

ANTIMONY

- *Price of antimony is high, USD \$3220/ton in 2005*
- *Used for flame retardants, transportation, chemical, ceramics*

Stibnite sample containing 71.8% antimony and 28.2% sulfur.

Morris Property,
British Columbia:
GOLD, SILVER
ANTIMONY, COPPER

Projects: YEAR-ROUND EXPLORATION
